

# Neil Francis S. Maapoy

Advanced App Engr. Sr. Analyst  
Open to Front-end-leaning Full-stack Roles

Full-stack developer with 10+ years of experience building web and desktop applications across multiple industries. Strong expertise in **React** and **Node.js**, including API development and CMS integrations. Experienced in **Agile/Scrum** environments, working closely with onshore teams and adapting quickly to changing requirements.

## RELEVANT EXPERIENCE

### Heating Solutions Industry Project (Accenture - ACN) - Sitecore Developer

JUL 2025 - PRESENT

- Developed and enhanced reusable Sitecore components using React, collaborating with multiple delivery teams.
- Improved and maintained existing components to support frequent releases while ensuring stability and performance.
- Coordinated and resolved ServiceNow tickets, delegating tasks and ensuring timely issue resolution across the team.
- Worked in an Agile environment with continuous integration and deployment pipelines.

**Technologies:** Sitecore XM Cloud, React, Azure DevOps

### Beverage & Brewing Industry Project (ACN) - NodeJS & React Developer

JUN 2024 - JUL 2025

- Built a fully integrated Brand Planning Tool using React and Express, enabling efficient brand strategy planning for business users.
- Developed and maintained RESTful APIs and backend services using Node.js to support frontend features.
- Integrated Contentful as a headless CMS, including webhook-based updates, to streamline content authoring and publishing.
- Collaborated closely with onshore developers, designers, and stakeholders to deliver features under tight timelines.

**Technologies:** React, Node.js, Express, Next.js, Azure DevOps, Cosmos DB, Contentful

### Aerospace Industry Project (ACN) - Front-end Developer

APR 2023

- Refactored legacy front-end code to modern JavaScript standards, improving maintainability and reducing technical debt.
- Contributed as part of a SWAT team, delivering critical features in rapid development cycles.
- Quickly adapted to existing platforms and tooling to become productive immediately upon onboarding.

**Technologies:** JavaScript, SAP UI5, SAP HANA, Agile/Scrum

### Oil & Gas Industry Project (ACN) - NodeJS Developer

JUN 2022 - JUN 2024

- Developed and enhanced backend services using Node.js and Azure Functions to support evolving business features.

## MAIN SKILLS

NodeJS

React / NextJS

TypeScript

Microsoft Azure

## TOOLS / PRACTICES

NoSQL Databases -  
CosmosDB, CouchDB,  
MongoDB

Version Control - Git,  
GitHub, Azure DevOps

Unit Testing - Jest

CMS - Contentful,  
Sitecore

Restful APIs - MS Azure  
Functions, Azure APIM

- Integrated third-party APIs and internal services to improve system interoperability and data flow.
  - Supported joint testing and UAT sessions with client teams, increasing test pass rates and reducing production defects.
  - Mentored newly onboarded developers and supported ongoing feature development and bug resolution.
- Technologies:** Node.js, Azure Functions, Jest, MS SQL Server, Azure DevOps

### **Enterprise Software Development / Ecommerce (E79 Systems Inc) - Fullstack Developer**

2017 - 2022

- Developed and maintained web and desktop applications for multiple business clients.
- Built real-time features and optimized server performance to improve responsiveness and user experience.
- Developed a desktop application using Electron to manage multiple accounts, users, and devices.
- Worked directly with clients, addressing feedback and supporting production issues.

**Technologies:** JavaScript, AngularJS, Node.js, Electron, MongoDB, CouchDB, Shopify, DigitalOcean, Git

### **Accounting Solutions Company (ASCII Solutions) - PHP Developer**

2015 - 2017

- Developed and maintained enterprise web applications for business clients.
- Led and coordinated a small front-end team to ensure on-time project delivery.
- Worked closely with stakeholders to translate requirements into functional solutions.

**Technologies:** PHP, JavaScript, MySQL
